Deadline for Submission

2:00 p.m., Wednesday, March 26, 2025

RE: REQUEST FOR PROPOSALS FOR HABITAT RESTORATION PROJECTS IN SUPPORT OF THE 2025 STREAM MAINTENANCE PROGRAM (WATERSHED PARTNERSHIPS PROGRAM)

1. INTRODUCTION

- 1.1. Sonoma County Water Agency (Sonoma Water) invites proposals from firms interested in providing habitat restoration or enhancement services in support of Sonoma Water's Stream Maintenance Program (SMP) for the 2025 Watershed Partnership Program (WPP).
- 1.2. Sonoma Water does not guarantee work to any qualified firm.
- 1.3. This is not a bid process.
- 1.4. Sonoma Water reserves the right to select the proposal(s) which in its sole judgment best meets the needs of Sonoma Water and to award to only one or multiple qualified submittals.

2. PASS/FAIL REQUIREMENTS

- 2.1. Proposals that do not pass the requirements and show evidence thereof under the following Sections will not be evaluated under Section 9, Evaluation, below.
 - a. Section 4, Prevailing Wages (Submittal Item 8.2.c).

3. BACKGROUND

- 3.1. The SMP was developed by Sonoma Water to provide an efficient and organized program to conduct stream maintenance activities, comply with relevant environmental regulations, and maintain flood capacity while enhancing the program area's natural resources. Under the SMP, Sonoma Water maintains over 85 miles of engineered flood control channels, and holds hydraulic easements to work in approximately 100 miles of modified and natural channels within Sonoma County.
- 3.2. Primary SMP activities include vegetation management, sediment removal, and bank stabilization. The impacts to specific project areas that are associated with these activities are addressed by on-site mitigation. On-site mitigation, at a minimum, restores the beneficial uses and ecological function and values that were provided by the site in its original (pre-maintenance) condition.
- 3.3. In addition to on-site mitigation, Sonoma Water supports SMP mitigation at off-site locations within the watershed to address the temporary loss of beneficial uses and ecological functions during the time gap between when SMP activities occur and when on-site mitigation measures are fully functional. The WPP was formed by Sonoma Water to fund and implement off-site mitigation projects (watershed projects) that improve water quality and restore habitats and ecosystem functions. Watershed projects funded by Sonoma Water are first and foremost selected based on each project's ability to provide flood control (reduction of runoff, erosion, and sedimentation), water quality, habitat, and ecosystem benefits as suitable off-site mitigation for SMP impacts.
- 3.4. Each year, Sonoma Water contributes at least 10 percent of its annual stream maintenance construction costs to a fund for distribution to selected WPP projects. To meet regulatory requirements for the SMP, watershed projects must restore or enhance a combined area equivalent to at least 10 percent of the total area impacted by Sonoma Water's stream maintenance construction activities. WPP projects selected for funding by Sonoma Water are proposed to SMP regulatory agencies for approval as SMP mitigation.
- 3.5. For 2025, watershed projects proposed within Flood Control Zones 1A, 2A, 3A, 5A, and 8A will be considered for funding. Attachment 1 (Flood Control Zone Maps) is attached to this Request for Proposals (RFP) for reference.
- 3.6. Sonoma Water anticipates needing a minimum of approximately 1.80 acres of restored or enhanced habitat through 2025 watershed projects to fulfill the SMP's annual off-site mitigation requirement.

3.7. Watershed project requirements:

- a. Watershed projects may not be located on engineered flood control channels. Engineered channels are shown in red and orange in Attachment 1 (Flood Control Zone Maps).
- b. Projects may be located in headwater source areas, natural, or modified reaches shown in blue and green in Attachment 1 (Flood Control Zone Maps); streams or rivers; floodplains; wetlands; or estuarine systems. Because these regions within Sonoma County are largely privately owned, WPP partners most often include resource conservation districts and local non-profit organizations that maintain working relationships with landowners. However, WPP funding is not limited to these groups.
- c. Watershed projects that provide mitigation for other entities or impacts other than those related to the SMP are not eligible. Proposed projects must be standalone projects that will help meet Sonoma Water's off-site mitigation required by SMP permits.
- d. The proposer is responsible for acquiring and complying with environmental permits necessary to complete the project.
- e. The project must be installed by the end of 2025 or March 2026. Project requirements include a 5-year maintenance, monitoring, and reporting period. Annual monitoring must measure or quantify project success and include photo documentation. A technical report documenting project progress is due each year after implementation, with draft reports due November 1 and final reports due December 1. Annual reports must provide, at minimum, an executive summary of project activities conducted to-date, project location maps, and monitoring data and photographs and describe project goals, success criteria, final installation specifications, annual maintenance implemented, annual monitoring techniques and results, current success rate, any remedial measures implemented, and activities planned for the next year. Attachment 2 (Watershed Partnership Program Sample Annual Report Outline) is attached to this RFP, as required. For projects that include native tree or shrub plantings, the required success criteria is a minimum survival rate of 75 percent at the end of the fifth year. This includes trees and shrubs installed as cuttings, direct seed, and from containers. Success criteria for other project types will be negotiated with Sonoma Water and ultimately approved by regulating agencies. Typically, weed removal projects require 100 percent removal of target weeds each year for the project term or a minimum 50 percent cover (or 50 percent increase in cover) by natives at the end of the fifth year. Visual assessments and transect or point-line intercept monitoring may be required for projects that include weed removal, erosion control, rhizomatous plantings, broadcast seeding, installation of species-specific habitat features, or livestock exclusion fencing to track and quantify project effectiveness.

- 3.8. Desirable project features include, but are not limited to, the following items:
- a. Request Sonoma Water funding in the amount of \$100,000 or less.
 - b. Improves habitat, reduces sedimentation, or improves flow conveyance in SMP channels shown in Attachment 1 (Flood Control Zone Maps).
 - c. Large restoration area that meets or exceeds the SMP's annual off-site mitigation requirement. See Paragraph 3.6 above.
 - d. Minimal or no permitting effort.
 - e. Use of proven habitat restoration techniques.
 - f. Projects that inherently require less maintenance or less costly maintenance. For example, projects that employ passive restoration such as removal of grazing pressure or weed competition to encourage natural regeneration of native plant species already present, large woody debris installation, or self-watering or readily available irrigation source.
 - g. Direct benefits to special status species including steelhead (*Oncorhynchus mykiss*), Coho salmon (*Oncorhynchus kisutch*), Chinook salmon (*Oncorhynchus tshawytscha*), California freshwater shrimp (*Syncaris pacifica*), California red-legged frog (*Rana draytonii*), California tiger salamander (*Ambystoma californiense*), northwestern pond turtle (*Actinemys marmorata*), and foothill yellow-legged frog (*Rana boylei*).
 - h. Specifically for native revegetation projects, desirable project features include one or more measures to achieve the planting survival criteria. For example:
 - i. Use of plant species well adapted to the site conditions.
 - ii. Use of mulch or plant protection.
 - iii. Extended irrigation periods during plant establishment or in areas with harsh conditions such as coarse alluvium soil or soil that is prone to cracking.
 - iv. Incorporation of remedial or supplemental planting.
- 3.9. Examples of projects may involve one or more of the following:
- a. Native plant re-vegetation (such as establishing native trees, shrubs, grasses,).
 - b. Invasive plant removal.
 - c. Bioengineering or erosion control.
 - d. Bank stabilization.
 - e. Livestock management that benefits habitat, such as exclusionary fencing or grazing rotation.
 - f. Installation of species-specific habitat features, such as large woody debris, boulders, or step-pools.
 - g. Watershed-based sediment or other contaminant control.

- 3.10. Sonoma Water reserves the right to amend the existing agreement or enter into subsequent agreement(s) with the firm(s) selected, relying upon this competitive selection process, after the preliminary or initial work is completed for the project.

4. PREVAILING WAGES

- 4.1. Pursuant to Labor Code sections 1720 and 1771, the Project is subject to the payment of prevailing wages and will be subject to compliance monitoring and enforcement by the California Department of Industrial Relations (DIR). Each firm submitting a proposal must be a DIR-registered contractor pursuant to Labor Code section 1725.5 at the time the proposal is submitted.
- 4.2. A proposal from any firm that is not a DIR-registered contractor at the time the proposal is submitted will be rejected for non-responsiveness. Pursuant to Labor Code section 1725.5, all subcontractors identified in a firm's proposal who are performing work that requires payment of prevailing wages shall also be DIR-registered contractors at the time the proposal is submitted.
- 4.3. Prevailing wage requirements from the sample agreement are included as Attachment 3 to this RFP.

5. LOCAL SERVICE PROVIDER PREFERENCE

- 5.1. A 5 percent weighting will be provided in the total rating score for local firms. A Local Service Provider (local firm) is defined as a business or consultant that has a valid physical address located within Sonoma County from which the vendor or consultant operates or performs business on a day-to-day-basis, and holds a valid business license if required by a city within the jurisdiction of Sonoma County. A business shall affirm it qualifies as a local business on the provided Attachment 4 (Declaration of Local Business for Services).

6. LIVING WAGE

- 6.1. If selected for an agreement, the firm must comply with any and all federal, state, and local laws – including, but not limited to the County of Sonoma Living Wage Ordinance – affecting the services provided under the contract to be awarded pursuant to this RFP. Without limiting the generality of the foregoing, firms submitting proposals expressly acknowledge and agree that any agreement developed pursuant to this RFP is subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the agreement will be considered a material breach and may result in termination of the agreement.
- 6.2. The Living Wage Ordinance can be found at: [Living Wage Ordinance](#).

Examples of confidential materials include trade secrets. Each page shall be clearly marked and readily separable from the proposal in order to facilitate public inspection of the non-confidential portion of the proposal. Sonoma Water will consider a proposer’s request for exemptions from disclosure; however, Sonoma Water will make its decision based upon applicable laws. An assertion by a proposer that the entire proposal, large portions of the proposal, or a significant element of the proposal, are exempt from disclosure will not be honored. Prices, makes and models or catalog numbers of the items offered,

deliverables, and terms of payment shall be publicly available regardless of any designation to the contrary.

- b. Sonoma Water will endeavor to restrict distribution of material designated as confidential to only those individuals involved in the review and analysis of the proposal. Proposers are cautioned that materials designated as confidential may nevertheless be subject to disclosure. Proposers are advised that Sonoma Water does not wish to receive confidential or proprietary information and those proposers are not to supply such information except when it is absolutely necessary. If any information or materials in any proposal submitted are labeled confidential or proprietary, the proposal shall include the following clause:
 - i. [Legal name of proposer] shall indemnify, defend and hold harmless the Sonoma County Water Agency, its officers, agents and employees from and against any request, action or proceeding of any nature and any damages or liability of any nature, specifically including attorneys' fees awarded under the California Public Records Act (Government Code §6250 et seq.) arising out of, concerning, or in any way involving any materials or information in this proposal that [legal name of proposer] has labeled as confidential, proprietary, or otherwise not subject to disclosure as a public record.
